(54) HAND FREE COMPUTER SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To display received information without using any hand by providing a means for providing a hand free operating command and a socket opened outside a computer housing connected to the internal bus of processor means.

SOLUTION: A computer 102 has a display means for receiving information from a system unit 106 and displaying that information for a user. The display means has a head band 108, display screen 110, and adjustable arm 112 for connecting the display screen 110 to the head band 108. The computer 102 has a transducer/converter means for receiving the operating command from the user through communication with the system unit 106, converting the command to an electric signal, recognizing that signal and sending the recognized electric signal to a processor inside the system unit 106. Further, the computer 102 has a measuring means for performing electric measurement through the communication with the system unit 106.
